DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3; and claim 4, line 3: it is unclear what is meant by "of which the phase of a clock frequency is different". Does that mean each channel block has a different clock frequency? Clarification is required.

In claim 1, line 9, the term "an output yn that passes an n'th block's comparator is confusing. Is the output yn coupled to the comparator? Clarification is required.

Claim 1 recites the limitation "the final output" on line 12. There is insufficient antecedent basis for this limitation in the claim.

In claim 3, line 1; and, claim 6, line 1: the term "when supposing the number of channel blocks is N" is confusing. Clarification is required.

In claim 3, line 3, the term "1/N of each the clock frequency" is unclear. Clarification is required.

Claim 4 recites the limitation "the final output" on line 12. There is insufficient antecedent basis for this limitation in the claim.

In claim 6, line 3, the term "1/N of each the clock frequency" is unclear. Clarification is required.

Application/Control Number: 10/522,373

Art Unit: 2819

In claim 1, lines 6-8, it is unclear how an n'th channel output can be u_n and v_n at the same time. Clarification is required.

Claim Objections

Claim 1 is objected to because of the following informalities: On line 12, before "each", "the" should be deleted.

Claim 1 is objected because of the following informalities: Line 11 contains a period (.). A period is not an accepted punctuation within a claim.

Claim 2 is objected to because of the following informality: On line 1, "an" should be inserted between "is" and "odd".

Claim 5 is objected to because of the following informality: On line 1, "an" should be inserted between "is" and "odd".

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Application/Control Number: 10/522,373

Art Unit: 2819

Allowable Subject Matter

Claims 1-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Reasons for Indication of Allowability of Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: the prior arts of record fail to teach a time-interleaved delta-sigma modulator comprising inter alia: a plurality of channel blocks each having a different clock frequency, wherein an input signal is inputted to a first adder, and the output of a first adder of an n'th channel block is inputted to the first adder and a second adder of an (n + 2)'th channel block, wherein an output of the second adder in a given channel inputted to the second adder of that channel and to an (n+2)'th channel block and the output of a comparator is inputted to the first adder and the second adder of an (n+2)'th block.

Citation of Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nagata et al (US 5,345233) teach a delta-sigma modulator.

Fischer et al (US 6,215,429) teach an audio codec.

Yamazaki teaches a delta-sigma modulator.

CONTACT INFORMATION

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Joseph Lauture, whose telephone number is

(571) 272-1805. The examiner can normally be reached Monday to Friday

between 9:30 am and 6:00 PM

If attempts to reach the examiner by telephone are unsuccessful, the

examiner's supervisor, Timothy Callahan can be reached at (571) 272-1740.

The fax number for the organization to which this application is assigned is (571)

273-8300.

Information regarding the status of an application may be obtained from

the Patent Application Information Retrieval (PAIR) system. Status information

for published applications may be obtained from either Private PAIR or Public

PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-

direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll

free).
